# Appointment Chatbot integrated with WhatsApp

## DESCRIPTION:

The project "Appointment Bot" is an intelligent Chatbot using Natural Language Processing. Chatbot helps individual to integrate with quick access to help them guide respective things. Chatbot almost is like a secretary to oneself. It links with everyone. Things can be achieved by just in snap of fingers, so sharp and very accurate by using NLP.

## ABSTRACT:

Due to increasing technology, every company or establishment opt for modern solutions to make work more accessible within no time. Chatbot is similar concept that services to do modern and intelligent work to hassle with time and give optimal result. Appointment Bot provides with solution for booking instant appointments via WhatsApp for Haircare and Healthcare.

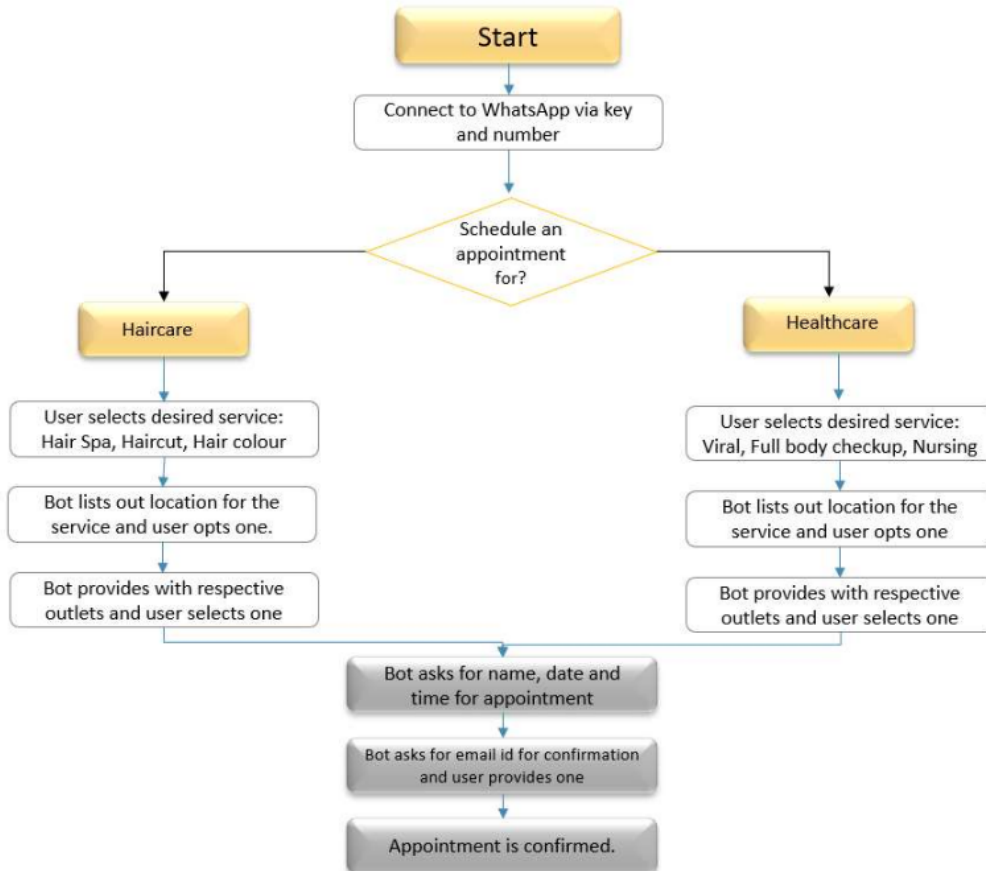

This chatbot provides with ultimate outlet for every service undertaken by user. Thus, the user is provided with maximum service under this chatbot. This Chatbot connects to user via WhatsApp. User will be connected to this Appointment Bot by the key provided. Customer services become intact and they can schedule their appointment by selecting particular date and time. Later their appointment is confirmed via email. This chatbot will be able to do the needful by convenient way provided to user and can create instant bridge with their queries and booking the appointment.

**Keywords:** Appointment, Hair Salon, Health, Hair Spa, Haircut, Viral, Checkup, Nursing.

## ALGORITHMIC FLOW

The given algorithm describes step structure of scheduling appointment. Step 1 follows with scheduling of appointment by responding to “hey”, “hello”, etc. Then Step 2 gives major services provided by bot which are Haircare and Healthcare and user can opt for any one service, if no Bot cancels the request and undertakes exit. Step 3 gives sub services under major services corresponding as Hair Spa, Haircut and Hair color for Haircare services and Viral Checkup, Full Body Checkup and Nursing for Healthcare services. In Step 4, the bot asks for location where the user wants to schedule the appointment; the location where this Chatbot employs are Mumbai, Navi Mumbai, Pune and Thane.

In Step 5 the chatbot lists out the outlets of all the services, these outlets are the best outlets selected by the Appointment chatbot for better user services. For example, if user selects Hair Spa as their service, then the bot will list out best Hair Spa outlets in given area provided by the user. Then in Step 6, Chatbot asks for date and time scheduling of the appointment; on this date and time users’ appointment is scheduled. And later in Step 7 Chatbot asks for email id for confirmation and then user has to provide their Email Id. And in last step, Step 8 Appointment Bot confirms the appointment.

**Algorithm:**

**Step 1: Schedule appointment or not**

1. IF schedule an appointment == YES go to step 2
2. IF schedule an appointment == NO, EXIT

**Step 2: Major services provided by bot**

3. From step 1.1, select the service 1) hair salon  
2) health care
4. IF input = hair salon go to next step
5. IF input = health care go to next step
6. Else cancel appointment request

**Step 3: Sub services under major services**

7. From step 2.4, select service 1) hair spa  
2) hair color  
3) hair cut
8. IF service = hair spa || hair color || haircut go to next step  
Else: EXIT
9. From step 2.5, select service 1) viral checkup  
2) full body checkup  
3) nursing
10. IF service = viral checkup || full body checkup || nursing go to next step  
Else: EXIT

**Step 4: Location and outlet**

11. ask user input, select location 1) Navi Mumbai  
2) Mumbai  
3) Thane
12. for hair salon, select outlet 1) Juice  
2) Enrich  
3) Tony and Guy

13. for health care, select outlet 1) NM medical center

2) Apollo hospital

3) CT nursing

14. input = invalid option, EXIT

**Step 5: Asks for date and time for the appointment**

15. input = "enter \$date and \$time", for slot booking

16. input = invalid slot, EXIT

**Step 6: Asks for email id for confirmation**

17. input = "enter valid email", for confirmation

18. input = invalid email, ask for valid email or cancel booking

**Step 7: Appointment confirmation**

19. IF confirmation == YES

Print "appointment is scheduled"

20. else EXIT and stop.

## RESULTS

Appointment chatbot offers ultimate result of scheduling appointments in hair salon and healthcare in Mumbai and Pune area. Scheduling appointments gives easy access to individuals on WhatsApp. WhatsApp makes it easier to list appointments and saves time, resources and energy. It is just like having a personal secretary to individual. This bot gives services of Hair Salon and Healthcare and provides best outlet in your area for your service. It asks for your name, by which you want to schedule the appointment. Further, it questions for the date and time of your appointment. And then gives the confirmation by inquiring your Email Id.

Thus, this Appointment Bot gives easy entrée and maximizes the convenience of a person. Appointment bot has two-way profit as it useful for the user as well as for the organizer where we are booking appointment.
